

# Feel like yourself again with comfort that complements your HRT

## Replens MD™ Long-Lasting Vaginal Moisturiser

- + Hormone-free
- + Clinically tested
- + Works alongside HRT

**Vaginal dryness during menopause is more common than you might think, but it shouldn't be something you just live with.**

## Why use Replens MD™ alongside HRT?

While HRT helps with many menopause symptoms, it can take up to 3 months to improve vaginal dryness and for some women, dryness may persist even during treatment.

Replens MD™ is a hormone-free vaginal moisturiser that can be used alongside HRT to provide fast, targeted relief.

Replens MD™ can bridge the gap by delivering fast, localised hydration to the vaginal tissues, helping you feel relief sooner while your HRT takes effect.

## How Replens MD™ works

### Deep hydration:

Replens MD™ releases purified water to hydrate vaginal tissues

### Protective barrier:

Forms a bioadhesive barrier that protects, supports and soothes the vaginal lining

### Long-lasting comfort:

Lasts for up to 3 days with each application

Replens MD is a medical device.

## Why women choose Replens MD™

- ✓ Clinically tested and hormone-free
- ✓ Can help to reduce discomfort, dryness and pain during intimacy
- ✓ Available without prescription

## What's in your trial pack?

**6x** pre-filled applicators  
(2-week supply)

**Each applicator**  
**= up to 3 days of comfort**

## How to use it:

- 1 Use every 3 days for best results or as needed
- 2 Gently insert one applicator of product, preferably in the morning
- 3 Feel immediate, long-lasting relief\* from dryness, itching and irritation

**Always refer to the product leaflet for detailed instructions and precautions.**

**Replens MD™ can also be used before intimacy to help you feel more confident and comfortable.**

## Take back control of your intimate health

Whether you're on HRT or not, Replens MD™ can help you feel like yourself again, confident, comfortable, and in control of your intimate health.
